PROFESSIONAL SUMMARY

Azure .NET Developer with **5.10 yrs** of experience designing and developing cloud-native applications and enterprise integration solutions using Microsoft Azure and .NET Core. Skilled in microservices, RESTful APIs, and event-driven architectures across logistics, retail, healthcare, and utilities domains. Hands-on expertise with Azure Functions, Logic Apps, Service Bus, Event Grid, Key Vault, API Management, and Application Insights, along with Azure DevOps YAML, Git, PowerShell, Azure CLI, CI/CD, SonarQube, Checkmarx, and Snyk. Microsoft Certified Azure Developer with exposure to Azure OpenAI and RAG pipelines.

TECHNICAL SKILLS

- **Languages & Data**: C#, SQL, KQL, HTML, CSS, JSON, XML
- **.NET Technologies**: .NET Core, .NET 6, .NET 8, .Net 10, ASP.NET Core, MVC, Minimal APIs, REST APIs, Entity Framework Core
- **Microsoft Azure**: Azure Functions, Logic Apps, Service Bus, Event Hubs, API Management (APIM), Key Vault, Blob Storage, Application Insights, Azure Monitor
- **DevOps & CI/CD**: Azure DevOps, YAML Pipelines, Git, GitHub, Jenkins, CI/CD, ARM Templates, Azure CLI, PowerShell
- **Security & Code Quality**: SonarQube, Checkmarx, Snyk, Static Code Analysis, Vulnerability Remediation, Secure Coding, Dependency Management
- **AI & GenAI**: Azure OpenAI, Azure AI Search, RAG, Vector Search, Semantic Search, Prompt Engineering, LLM Integration, Embeddings
- **Testing**: xUnit, NUnit, Moq, Unit Testing
- **Tools**: Visual Studio, VS Code, Postman, ServiceNow, Jira, Serilog, Control-M
- **Methodologies**: Agile, Scrum, Software Development Life Cycle (SDLC)

PROFESSIONAL EXPERIENCE

Capgemini | Consultant | Mar 2025 – Present | Noida

- Architected and developed scalable **REST APIs and integration services** using **.NET Core and Azure** for enterprise logistics platforms.
- Designed **Azure integration solutions** using **API Management, Azure Functions, Service Bus, Key Vault, and Application Insights** to support secure and scalable workflows.
- Participated in migration initiatives from **.NET 8 to .NET 10**, improving application performance, maintainability, and supportability.
- Implemented **monitoring, alerting, and observability** using **Azure Monitor and Application Insights**, improving incident detection and operational visibility.
- Diagnosed and resolved complex **application, API, integration, and production issues** using **Application Insights, Postman, and Visual Studio**, performing root-cause analysis to improve system reliability and minimize downtime.
- Collaborated with **business stakeholders and client teams** to analyze requirements, resolve production issues, and deliver technical solutions.

TCS | System Engineer | Mar 2023 – Feb 2025 | Noida

- Developed and maintained **microservices-based applications** using **C#, .NET 6, .NET 8, ASP.NET Core, Minimal APIs, and Azure services** for large-scale retail platforms.
- Migrated applications from **.NET 6 to .NET 8**, improving **performance, maintainability, scalability, and long-term supportability**.
- Built enterprise integrations using **Azure Functions, Logic Apps, Service Bus, and Event Hubs**, enabling reliable **event-driven communication** across distributed systems.
- Diagnosed and resolved **application, API, integration, and performance issues** using **Application Insights, Postman, and Visual Studio**, performing root-cause analysis and implementing corrective solutions.
- Developed **unit and automated test suites** using **xUnit, NUnit, and Moq**, achieving high test coverage across business logic, APIs, and critical application components.
- Performed **code quality, test coverage, and static security analysis** using **SonarQube, Snyk, and Checkmarx**, remediating **code smells, vulnerabilities, dependency issues, and untested code paths** to improve application quality, maintainability, security, and reliability.
- Built and supported **distributed cloud systems** using **GCP, Apache Kafka, Docker, and Control-M** for enterprise healthcare applications.

Infosys | Senior System Engineer | Nov 2020 – Feb 2023 | Hyderabad

- Designed, developed, and maintained enterprise web applications using C#, ASP.NET Core, MVC, Entity Framework, Angular, and SQL Server.
- Built reusable application components and RESTful services following coding standards and software engineering best practices.
- Provided L2/L3 production support in AMS environments, troubleshooting critical incidents and maintaining high system availability.
- Managed incidents, service requests, and change requests through ServiceNow processes.

PERSONAL PROJECT

AI-Powered Professional Portfolio | Azure OpenAI, Azure AI Search, Streamlit

- Designed and developed an AI-powered conversational portfolio using **Azure OpenAI, Azure AI Search, and Streamlit.**
- Implemented a hybrid RAG pipeline combining **Semantic Search, Vector Search, and text-embedding-3** embeddings to retrieve context-aware information from a custom knowledge base.
- Applied **Prompt Engineering** and **LLM** integration to generate context-aware responses.
- **Live Demo:** Click here | GitHub: Click here

CERTIFICATIONS

- AZ-305: Azure Solutions Architect Expert
- AZ-204: Azure Developer Associate
- AZ-104: Azure Administrator Associate
- AI-900: Azure AI Fundamentals
- Claude Certified Associate – Foundations

EDUCATION

B. Tech – Computer Science & Engineering | Ajay Kumar Garg Engineering College, Ghaziabad | 2016 – 2020 | CGPA: 8.41

ACHIEVEMENTS

Recipient of Infosys Insta Award for outstanding performance and contribution.
